Subwoofer Wiring Size. For systems with less than 1000 Watts RMS, 16-gage speaker wire is adequate. If your system has 1000 Watts RMS or more, you should upgrade to 12-gage speaker wire. These are just some suggested guidelines for minimum wire size. Feel free to upsize the speaker wire if you so choose.

loudspeaker that provides high performance at an entry level price point. Packaged into a smaller footprint, the Edge3i uses the same rigid metal frame and tapered perimeter glass resin soundboard that create the warm, immersive sound the Edge series is known for.

Edge Series - Amina UK

The power wire from your amp wiring kit (usually 16-20 feet in length) needs to run from the battery, through your car's firewall, through the car's body to the amp. Find an unused grommet in the firewall or one that already has wires or cables passing through it and that has enough room for the power wire to fit through too.
